CAREER OBJECTIVE:

Aiming to contribute innovative ideas, strong problem-solving skills and a willingness to learn within the organization. Looking forward to working in a supportive team that fosters growth, skill development and a solid foundation for future success.

SKILLS:

- **Programming Languages:**C
Python, Java (fundamentals)
- **WebTechnologies:**HTML, ·
- DatabaseManagement:**SQL
- Problem Solving**
- AI Fundamental**
- Good communication**

CERTIFICATIONS:

- NPTEL - python- 56%
- Data Science For Endineering-55%

EDUCATION:

B.Tech in Computer Science and Engineering (Data Science) - 2024-2028

NRI Institute of Technology CGPA: 8.5

AP BIEAP (Intermediate) - 2022-2024

Narayana College CGPA: 9.01

SSC (Xth)- 2021-2022

Narayana School CGPA: 8.9

PROJECTS: PM InternshipRecommendation System

Developed an AI-based recommendation solution that suggests personalized internships based on students’ skills, education, interests, and location. Designed a mobile-friendly and multilingual interface to improve accessibility for first-generation learners and students from rural backgrounds.

Emotion Detection:

Built an emotion detection system that analyzes facial expressions and classifies them into seven emotions using image data. Designed and trained a deep learning model to improve accuracy in recognizing emotions from faces. Integrated real-time testing and visualization to evaluate predictions effectively.

EXTRA-CURRICULAR ACTIVITIES:

- Attended a Generative AI workshop conducted at NRI College and gained valuable insights into cutting-edge AI technologies and their practical applications.
- Actively participated in various coding competitions to enhance problem-solving and programming skills.
